🐙 <https://github.com/armedev>

Summary

Full-stack developer with 3+ years building scalable web products and **system design** across **React/Next.js** and **NestJS**. Experienced in **microservices** and data platforms using **Rust/Golang**, **gRPC/GraphQL/REST**, **PostgreSQL**, and **Docker**, delivering fast, high-quality results in startup environments.

Experience

Tursio

Software Engineer

Bangalore, India

June 2025 - Present

- Orchestrated the **full product and website revamp**, modernizing search, insights, data model, and semantic table experiences.
- Lifted **PageSpeed** to 90+ and achieved **SEO ~100** and **Accessibility ~95** via lazy loading, accessibility fixes, and schema markup for agent support.
- Drove **end-to-end feature delivery** from natural language search and data model enhancements to query validation for enterprise insights.
- Shipped **data visualization and analytics UI** including bar charts, filters, and metric tabs for self-serve analysis.
- Built and launched an **embeddable search portal** that lets customers integrate AI-powered search via a simple script tag.

Gida Technologies

Software Developer

Bangalore, India

September 2023 - May 2025

- Shipped full-stack web applications for **Max Group** and **HDFC** using **Next.js** and **NestJS**, serving thousands of enterprise users.
- Improved performance and SEO across products with **Next.js SSR/SSG** and optimized page delivery.
- Owned delivery of **AgeEasyByAntara**, **Ergo Self-Help Portal**, and **Convenex Portal** through production.

BurdenOff Consultancy Services

Full-Stack Developer Intern

Remote

Jun 2022 - Dec 2022, Feb 2023 - Jun 2023

- Architected a **provider-agnostic payment system** using an adapter pattern to future-proof billing.
- Integrated **Stripe** with webhooks and two-way verification for secure transaction validation.
- Built the **PaymentMethod** model and transaction flow to support secure, recurring payments.
- Enhanced core modules (**Payment**, **Notification**, **Billing/Account**, **Wallet**, **Store**, **Product**) using **GraphQL**, **TypeScript**, and **ArangoDB**.
- Designed a **type-safe model architecture** that strengthened security and reduced vulnerabilities.

NETART-INDIA

React Developer Intern

Remote

Jun 2021 - Jan 2022

- Built an **R&D SEO dashboard** using **React** and **FireCMS**, enabling the team to generate and track SEO reports from a single unified interface.
- Engineered a **scheduler** to eliminate data capture clashes and automated the entire reporting pipeline using **Ulvision** and **App Script API**, significantly reducing manual workload.

Projects

Resume

- Version-controlled resume with automated PDF generation via GitHub Actions and Docker.
- Tag-based releases publish the PDF to GitHub Pages and GitHub Releases.
- Stack: **Python, Docker, GitHub Actions**.

Smart Skills

- CLI to manage and sync AI agent skill configs across OpenCode, Neovim, Cursor, and Claude Code.
- Rust-based standalone binary with validation for safe skill formats and zero npm dependencies.
- Stack: **Rust, CLI**.

Education

Jawaharlal Nehru National College of Engineering

Information Technology

B.E.

2019 - 2023

Sri Aurobindo Pre University Independent college

Science

PUC

2017 - 2019

Skills

TypeScript

JavaScript, esbuild, swc, Webpack, Rollup

Rust

Actix-web, CLI, Clap

Golang

WebSockets, Microservices, gorilla/websocket

React

Hooks, Context, Custom Hooks, Zustand, Framer Motion

Next.js

SSR, SSG, ISR, CSR, PageSpeed Insights

SolidJS

Signals, Reactive UI, Performance

NestJS

Node.js, Microservices, Middleware, Axios

PostgreSQL

Queries, Indexes, Relations, Database Design
